#### DETAILED ACTION

#### Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

SPECIES 1	FIGURES 1-3
SPECIES 2	FIGURES 4 & 5
SPECIES 3	FIGURE 6
SPECIES 4	FIGURE 7
SPECIES 5	FIGURE 8.

The species are independent or distinct because they illustrate wire nettings, longitudinal rails and cross rails of different structural configurations.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-5 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. During a telephone conversation with Lawrence J. Krain on September 29, 2006 a provisional election was made without traverse to prosecute the invention of Species 1, claims 1-5 and 8-13. Affirmation of this election must be made by applicant in replying to this Office action. Claims 6 and 7 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

# Specification

- 3. The disclosure is objected to because of the following informalities:
  - 1) On page 1, in line 7: "fabrice" should be changed to --fabric--.
  - 2) On page 5, in line 9: The number --11-- should be inserted after "sockets".

    Appropriate correction is required.

## Claim Objections

- 4. Claim 8 is objected to because of the following informalities:
  - 1) In lines 7 & 8: The term --longitudinal-- should be inserted before "steel".
  - 2) In lines 16 & 17: The term --cross-- should be inserted before "steel".

    Appropriate correction is required.

## Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 6. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Pat. No. 2,870,823 to Staples (note especially Figures 1 & 3; column 2, lines 60-70 and column 3, lines 21-51).
- 7. Claims 1-5 and 8-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Pat. No. 3,733,625 to Platt et al. (note especially Figures 1-8; column 2, lines 9-20 & 40-51 and column 3, lines 16-56).

## Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
